Smart camera, clear image - day and night

Smart surveillance camera from Hama

Many people know the uneasy feeling of not knowing what is going on in their own garden or driveway - especially at night. The smart surveillance camera with light and motion detector from Hama literally brings light into the darkness and puts an end to guesswork. In 2.5K resolution, it delivers a sharp live image in colour and can store recordings on an optional SD card or in the cloud if required. Thanks to the integrated spotlight, even coloured night vision possible. Alternatively, infrared night vision ensures that you can clearly see what is happening in the dark without any additional lighting.

own garden or driveway - especially at night. The smart surveillance camera with light and motion detector from Hama literally brings light into the darkness and puts an end to guesswork. In 2.5K resolution, it delivers a sharp live image in colour and can store recordings on an optional SD card or in the cloud if required. Thanks to the integrated

More control, fewer false alarms

The camera is integrated directly into the WLAN without a gateway and is compatible with all common smart home assistants. The two-way audio makes it easy to talk to people in front of the camera - such as parcel delivery staff. Practical: when motion or noise is detected, the camera sends a push notification. Motion detection can be limited to certain areas of the image and set so that only recognised persons trigger a reaction, while other movements are reliably filtered out. This ensures that unusual activities do not go unnoticed, and thanks to selectable scenarios, the camera comes remarkably close to a real alarm system.

Another plus point: the light from the camera can also be used as practical lighting. As soon as a person moves, the light switches on automatically, making it easy to find the door lock, for example. The camera is also IP65-certified and therefore fully suitable for outdoor use. It can be easily installed

About Hama
