Mouse pad charges the smartphone

"Wireless Charging" mouse pad

A mouse pad with integrated Qi charging function for smartphones solves two problems at a stroke. With its "Wireless Charging" mouse pad, Hama is offering a model that charges a smartphone while it's in use. Charging begins automatically after the smartphone is placed on it. To end the charging process, the smartphone is simply lifted off the pad.

The smooth, leather-like polyurethane surface allows virtually any mouse to glide particularly smoothly over it, while a special underside prevents the mouse pad from sliding around. With dimensions of 30.5 x 20.5 cm, it is large enough for the smartphone not to disturb the cursor. The charging

surface is also marked on the right-hand side. The "Wireless Charging" mouse pad, which is available from retailers for around Euro 28, draws its power through the USB cable supplied.

Item No. 54772 "Wireless Charging" mouse pad

About Hama

Founded in 1923, Hama today accompanies people in all situations every day with around 18,000 accessory products. Whether it be their smartphone, smart home, smartwatch, TV, audio, computer or photo: every product impresses with high quality, appealing design and innovative functions. The company employs 1,500 people at its German headquarters in Monheim, Bavaria, and around 2,500 worldwide. With 19 foreign locations and numerous commercial agencies, Hama enjoys a global presence.
